

kitchen tools

Dear Dr. Oetker customer,

In recent years, baking has gained significance, probably more than almost any other topic in the food industry, growing from a hobby to a popular, lasting trend. As a result, demand for baking utensils and innovative product ideas has also soared.

We from Dr. Oetker kitchen tools have followed this development with enthusiasm and implemented it accordingly in our range – always oriented to the wishes of our customers.

Since taking over the license for production and sale of the Dr. Oetker baking trays and kitchen tools in 2013, we have extended our expertise by developing numerous ranges for different demands. Our newest range "Back-Trend" convinces with its ceramic reinforced coating, which guarantees excellent baking results thanks to its very good heat conduction and premium non-stick properties. The baking trays also inspire visually by the modern and appealing colouring in grey and crème and thus are a real eye-catcher in every kitchen.

Our range of baking tools is equally characterised by products of highest quality. Made from stainless steel in an elegant design or manufactured from platinum silicone for especially creative products – all of our tools present a very high functionality and level of innovation.

Useful modelling tools for marzipan and fudge, handy cookie cutters, colourful muffin wrappers and gift boxes round off the Dr. Oetker kitchen tools range in the product area of decorating and garnishing. Homemade cakes, muffins and cupcakes are lovingly and imaginatively decorated and subsequently put in gift boxes to be given away with a lot of love.

Owing to the excellent partnership between the food company Dr. August Oetker Nahrungsmittel KG from Bielefeld and Zenker Backformen GmbH & Co. KG in Aichach, there is a constant development of new and exciting products with a high level of innovative strength. The common guiding principle of the joy of baking is the constant focus point of product development – from the first idea to the finished product.

You'll be surprised and inspired by our wide range of practical and sophisticated products!

Your Dr. Oetker kitchen tools team

DR. OETKER GUARANTEED QUALITY

Guaranteed quality from Dr. Oetker's test kitchen

More than any other food brand, Dr. Oetker stands for the joy of baking. With its well-known brand promise "Quality is the best recipe," the company continues to hold a leading position in the national and international food markets. Thanks to its innovative strength, it is a role model and trend setter rolled into one. Zenker's goal is to achieve the same leading position for Dr. Oetker baking trays and kitchen tools.

That means giving top priority to product quality and baking results, continuously enhancing existing products, and paving the way for new baking fashions with creative and innovative ideas. To this end, we work closely with baking experts in Bielefeld and apply our own tried and tested in-house quality management. Zenker has been making products in Germany for almost 130 years and is committed to the quality standard "Made in Germany".

Our products guarantee a perfect baking experience – because satisfied customers are what matter most. That's why Dr. Oetker baking trays and equipment are subject to careful quality control in our test kitchen before they end up in shops and your kitchen.

The Dr. Oetker guaranteed quality is only awarded to our products after their successful undergoing of all tests. All baking trays are used with different kinds of dough and all kitchen tools are checked based on their varying area of application. All products are tested in light of their long-term resistance and cleaning behaviour. They also play an important role in the development of creative new recipes.

You can rely on Dr. Oetker's test kitchen with more than 125 years of experience in ensuring quality and guaranteed success.

Find out more www.oetker.de and www.oetker-kuechenhelfer.de.

QUALITY AND TRUST

10 good reasons for trusting in Dr. Oetker baking trays and kitchen tools:

1. Dr. Oetker stands for 125 years of baking and cooking with guaranteed success.
2. Dr. Oetker is one of Germany's best known, most popular and appealing brands.
3. Dr. Oetker baking trays stand for quality "Made in Germany" and are manufactured in our own factory in Aichach (Bavaria).
4. Only highest-grade materials and coatings are used for Dr. Oetker baking trays and kitchen tools.
5. Comprehensive quality assurance guarantees consistent quality.
6. The highest quality standards are guaranteed through close cooperation with the Dr. Oetker test kitchen.
7. All baking trays are tested regularly in the Dr. Oetker test kitchen on more than 50 different cookers and microwave ovens to ensure guaranteed success.
8. Helpful tips and tricks can be found on the packaging of Dr. Oetker kitchen tools.
9. A varied and versatile range of baking trays and kitchen tools covers customers' daily and seasonal needs.
10. Innovative new products with high functionality and ease of use provide a welcome change in the kitchen.

COMPANY Successful partnership

In 2013, Dr. Oetker devolved the production and sale of its baking trays and kitchen tools to Zenker, a Bavarian manufacturer of baking products, as part of a licensing agreement with a national and international focus. This means that two long-established firms are now working together: Dr. August Oetker Nahrungsmittel KG founded in 1891 in Bielefeld, and Zenker Backformen GmbH und Co. KG in Aichach, Upper Bavaria. Zenker has been making high-quality baking products since 1885 based on its experience and expertise gained over decades.

Zenker is famous for products with outstanding quality using only the best raw materials and applying strict quality controls.

Comparison of non-stick coatings

All Dr. Oetker baking trays are subject to the highest quality standards and are regularly tested for quality and functionality. We only use the very best materials for each baking tray. To provide a better overview and classification of the coatings used on Dr. Oetker baking trays, we have introduced logos to enable a comparison of our non-stick coatings. One of these four logos displaying the quality of the coating can be found on each packaging to enable customers to recognize the differences at a glance: CLASSIC (first grade), SPECIAL (second grade), PREMIUM (third grade) and PERFECTION (fourth grade).

CLASSIC	SPECIAL	PREMIUM	PERFECTION
For traditional bakers Very good non-stick properties	For friends of baking who love to experiment Superior non-stick properties	For ambitious baking enthusiasts Premium non-stick properties	For passionate baking fans Ultimate non-stick properties

The Dr. Oetker product range also includes baking trays without a classical non-stick coating, but made using materials like enamel or silicone instead.

Enamel is applied to the baking tray in a liquid form and then fired at a high temperature. This produces a very hard, glass-like surface that withstands temperatures of up to 400°C, is cut and scratch-resistant, dishwasher-safe and absolutely resistant to fruit acid.

Enamelling is a complex production stage designed to ensure the high quality and durability of baking trays and roasting dishes as a premium product. We use enamel mainly in our Back-Liebe Emaille series.

Platinum silicone is ideally suited for baking trays and kitchen tools thanks to its purity and flexibility. Dr. Oetker uses platinum silicone exclusively for all baking trays and kitchen tools in its Flexxibel and Flexxibel Love ranges.

The material is also ideal for more sensitive applications, such as for medical products and baby items. It is guaranteed food-safe, inherently stable and dishwasher-safe, and is designed for easy removal of baked goods from the mould.

Selection of our versatile assortment:

BACK-EDITION

Perfection – the newly developed non-stick coating for the highest demands
Ultimate non-stick properties

PRESERVING

PRESERVING

Homemade with love! Thanks to the individual and detailed Dr. Oetker products for preserving, making homemade marmalades, syrups and fruits becomes a real treat. The new and lovingly designed display evokes a pleasantly peaceful fruit orchard and is a visual highlight at the POS. Additional to a very good presentation of the products, the display conveys an emotional message, too: A feeling of home and security, of a culture of well-eating and passing on our values to our loved ones.

MODERN-BAKING RETRO-DESIGN

Nostalgic design and creative trend articles form a harmonious entity – the kitchen tools and baking tins concept "Modern Baking – Retro Design" bridges the gap between tradition and modernity. The result: Extraordinary muffin baking cases, storage tins with exceptional graphic patterns and pastel shades, and baking tins in a trendy, bicoloured optic that turn every sweet table into a real eye-catcher and address mainly young and creative baking enthusiasts.
